

“Williams Group contracted Cambian to build us a comprehensive software application that empowers optometric practices to electronically manage their business—from booking patient appointments, to ordering spectacles and contact lenses, to billing clients and processing insurance claims.

Cambian's phenomenal effort, exceptional knowledge of processes and systems, and strong analytical skills exceeded our expectations. Not only did they deliver an intuitive optometric system, but they included accounting, inventory, and marketing components as well.

Cambian has saved us months of time and an enormous amount in development costs by leveraging their years of experience, their team of professionals, and their toolkit of technologies to shorten this project's schedule and produce a compelling product.

Thank you, Cambian, for a job extremely well done. It has been a huge endeavor but you folks got it done!!! We are very impressed with the product and can hardly wait to get it in the hands of our clients.”
